

European Guidelines for Specialty Training in Oral & Maxillo-Facial Surgery

Union Européenne des Médecins spécialistes

UEMS, M. W.-K. Busch, Harburger Rathausstr. 41, 21077 Hamburg, Germany.

INTRODUCTION

Oral & Maxillo-Facial Surgery is a medical specialty which has developed by different means and with different results in the various countries of Europe.

In order to adjust the objectives on training of OMFS it will be to the advantage of all European countries to rely on guidelines which guarantee quality assurance of training and provide optimum patient care.

The UEMS-section of Stomatology and Oro-Maxillo-Facial Surgery and the European Association of Cranio Maxillofacial Surgery in their capacity of representing the specialty of Oral & Maxillo-Facial-Surgery on scientific and professional level in Europe feel obliged to serve as advisor regarding education and training of OMFS and to assist all European countries in their work to record the fundamental requirements for specialty training in Oral & Maxillo-Facial-Surgery.

EU legislation, national rules and the International Guidelines of Oral & Maxillo-Facial Surgery are important components which must be taken in consideration when setting up training programmes and standards for the specialty.

DEFINITION AND SCOPE OF THE SPECIALTY

Oral & Maxillo-Facial Surgery is that Specialty concerned with the history

— taking, prevention, examination, treatment and rehabilitation of the congenital and acquired pathologic conditions of the cranium, the face, the mouth, the jaws and the neck. Acquired conditions can result from disease, malformation, tumour, trauma, degeneration and ageing.

The scope includes but is not limited to:

- management of pain and anxiety;
- dento-alveolar surgery including periodontology;
- treatment of infections involving bone soft tissues in the head and neck area;
- management of the cranio-maxillo-facial trauma (bone, teeth, and soft tissues), both acute injuries and sequellae);
- oral pathology/oral medicine;
- preprosthetic surgery including implantology;
- surgical and non surgical management of the temporomandibular joint disease and disorders;
- oncological surgery and treatment in the head and neck area, including benign and malignant salivary gland tumours, and management of regional lymph node stations;
- regional reconstructive surgery including harvesting of hard and soft tissue grafts and free tissue transfer including microsurgery;
- orthognathic/facial orthopaedic surgery and treatment;
- aesthetic/cosmetic/plastic facial surgery;

- surgery and treatment of congenital abnormalities including clefts of the lips and palate;
- craniofacial surgery.

STANDARDS OF TRAINING

In order to practice the full scope of the specialty oral and maxillo-facial surgeons are unique in that they require education and training in both medicine, dentistry and a training in surgery in general and in the relevant surgery of the specialty which should be formally recognised based on national requirements.

The specialty training in oral & maxillo-facial surgery may be accomplished in a number of ways. The entry point may be either a medical degree or a dental degree.

The duration of core training for Oral and Maxillo-Facial Surgery should be 6 years.

National programmes may include up to 2 years of either relevant surgical training or may include up to 2 years of the relevant 2nd degree. (medicine, dentistry or stomatology as they are recognised in the Directives of the ED).

FACULTY

The advanced training programme in oral and maxillofacial surgery must be directed by an oral and maxillofacial surgeon. The head of training should

have been practicing the specialty of Oral and Maxillo-Facial Surgery for at least 5 years after qualification. There should be additional teaching staff in sufficient number to ensure that all trainees receive sufficient teaching and close personal monitoring during the training. Both teacher and staff should be practicing the full range of Oral and Maxillo-Facial Surgery. All faculty members should have undergone training in education techniques and are requested to show evidence of CME/CPD. The teacher must provide a training programme for the trainee in accordance with the trainee's own qualities and facilities of the institution which also comply with national rules and EU-legislation.

It is the director's responsibility to ensure that individuals completing training meet the performance standards for the programme and for the practice of the specialty.

All training programmes should be directed by a single responsible individual.

The programme director should devote adequate time to the training program to ensure:

- the development and implementation of a planned curriculum;
- ongoing evaluation of the programme content, faculty teaching and resident performance;
- proper administration of the programme;
- maintenance of records related to the educational programme.

The size and time commitment of the teaching staff should be sufficient to ensure:

- continuity of instruction;
- exposure of trainees to a broad range of diagnostic and treatment modalities;
- faculty participation in teaching activities, including conferences and seminars;
- quality assurance and audit through the evaluation of complications and outcomes of all relevant cases.

Faculty should be available for supervision and consultation for procedures completed in the operating room and outpatient departments.

REQUIREMENTS FOR TRAINING INSTITUTIONS, FACILITIES AND RESOURCES

Training institutions for the specialty of Oral and Maxillo-Facial Surgery must be recognised by the national authority of the country.

The size and diversity of the training institutions and programmes have to consider both quality and quantity of training activities. Specialty training in oral and maxillo-facial surgery requires both outpatient clinic and operating room experience. Clinical facilities should be properly equipped for performance of all ambulatory and inpatient oral and maxillo-facial surgery procedures. In addition to patient care facilities and resources should be adequate to provide the educational experience and opportunities for research required to fulfil the needs of a programme which will lead to the registrable qualification of an Oral and Maxillo-Facial Surgeon. Quality assurance must be an integral part of the training programme of all training institutions. A national register of approved hospital institutions should be available.

REGULATIONS OF ACCESS TO TRAINING

Regulations of access to training in the specialty should be implemented by the National Authority in accordance with national manpower planning projections in each EU member state.

Teachers and training institutions or other responsible bodies select and appoint in accordance with national rules trainees who are suitable for oral and maxillofacial surgery. The selec-

tion should be transparent and application should be open to all persons who preferably hold both medical and dental qualifications at the time the training is completed.

CURRICULUM

Medicine

The trainee must have the medical degree which will provide the ability to evaluate the total patient and to assess the patient for surgical and anaesthetic risks.

The trainee must be familiar with patient evaluation, including additional experience in the art of history taking and comprehensive physical examination and further more with therapeutics including sufficient knowledge of all the relevant accepted therapeutic agents e.g.: chemotherapy, radiotherapy.

Fundamental to the training of an oral and maxillo-facial surgeon is extensive experience in the areas of critical care of the seriously ill surgical patient and the team management of the severely injured patient.

Dentistry

The trainee must have also extensive training in dentistry which is not only an integral part of the specialty but also differentiates oral and maxillofacial surgery from other medical specialties.

The trainee must be familiar with the full scope of dentistry including prosthetics, orthodontics, dental surgery and dental restoration.

Specialty

The oral and maxillo-facial trainee must be exposed to the full scope of the specialty.

Clinical training in oral and maxillo-facial surgery should provide a complete, progressively graduated sequence of outpatient, inpatient and
